SECTION 1:

1.What is the length of ipv4.......(32 chars)

2.DDNS stands for............(dynamic DNS)

3.Remote protocol send data over the network. (T/F) F

4.Which subnet dose host 172.17.175.122 255.255.255.128

  belongto........................   (172.17.175.0)

5.DNS resolve .... name. (URL)

6............protocol is used for transfering the

  confidential data.   (TCP)

7...........protocol is standard for DHCP. (BOOT STRAP)

8......................Command is used for schema master

  registry.   (regsvr32 schmmgmt.dll)

9..........will show you the activities happening on the

  system   (Auditing)

10.How many hosts can we attached to each subnet? (254)

11.IP address of routers interface is called............. (default gateway)

12.Expand FSMO............ (Flexible Single Master Operation)

13................Command is used for finding the errors in

   run applications.   (drwtsn32)

14.What is the port number of DHCP client..............   (546)

15.POP3 stands for............ (Post office protocol)

SECTION 2:

1.You have been asked to provide a DHCP installation for a small firm

  currently using static IP allocation. Which parameters can be assigned

  by DHCP?(Choose all that apply)   ans:a,c,d

a.IP address b.MAC c.Default Gateway d.DNS server

2.You are configuring DHCP to integrate with DNS server and so are going

to use the dynamic update feature. Which options are available during

the operation?(Choose all that apply) ans:c,d

a.Update of forward lookups only

b.Update of reverse lookups only

c.Update if only client requests

d.Always update both forward and reverse lookups

3.You are installing the root domain controller for your forest.You have

decided that the fully qualified domain name for the computer will be

employee.ibm.com. The system prompts you with a suggested NetBIOS name

for the computer. Which NetBIOS name is prommpted?   ans:b

a.employee.ibm   b.employee   c.IBM   d.employee.ibm.com

4.Subnet main use is to control the........   ans:a

a. Broadcasting b. Domain control c.Routing d.Providing IPaddress

5.You want to implement a Group policy object that will distribute the

latest office service pack. You are thinking about distributing this GPO

to an Active Directory object. What is your choice?   ans: c

a. A Tree   b. A Forest   c.An organizational unit   d.None

6.You are designing a subnet mask for the 172.27.0.0 network. You want 800

subnets with upto 50 hosts on each subnet. What subnet mask should you use?   ans:c

a.255.255.255.32   b.255.255.255.224   c.255.255.255.192   d.255.255.255.128

7.You are the administrator of a windows server 2003 that has a single 80GB drive

the drive is configured as a single primary partition. The partition contains a

shared folder named users where users save their personal files,

you want to prevent users from using more than 100MB disk space

in the shared folder. What actions should you take to accomplish this?

(choose all that apply)   ans: c

a.upgrade the disk to a dynamic disk.

b.enable disk quotas for the users shared folder,set the default quota

  limit to 100MB.

c.enable disk quotas for entire volume,set the quota limit to 100MB.

d.enable shadow copies for users shared folders.

8.You are troubleshooting a Windows XP client machine,and have just changed the name

  of the computer and IP address. You now want to makesure the client itself regesters with

  a DNS server.What command would you use to do this?   ans:a

  a) Ipconfig /renewdns

  b)Ipconfig /registerdns

  c)nslookup /refreshclient

  d)ntdsutil /sendconfig

9._____takes the replication done for the time span and initiate these changes to domain

   controller?   ans:c

   a)RFC1542   b)DHCP

   c)Additional DC   d)WINS

10.DHCP works on _____ layer   ans:a

   a)application layer   b)host to host layer

   c)physical layer   d)internet layer
