## Module:- COSA(Windows server-2019 Installation)
## Name:- Prithviraj Nikam

Lab Assignment :-

Install and Configure Following OS on virtual Box:
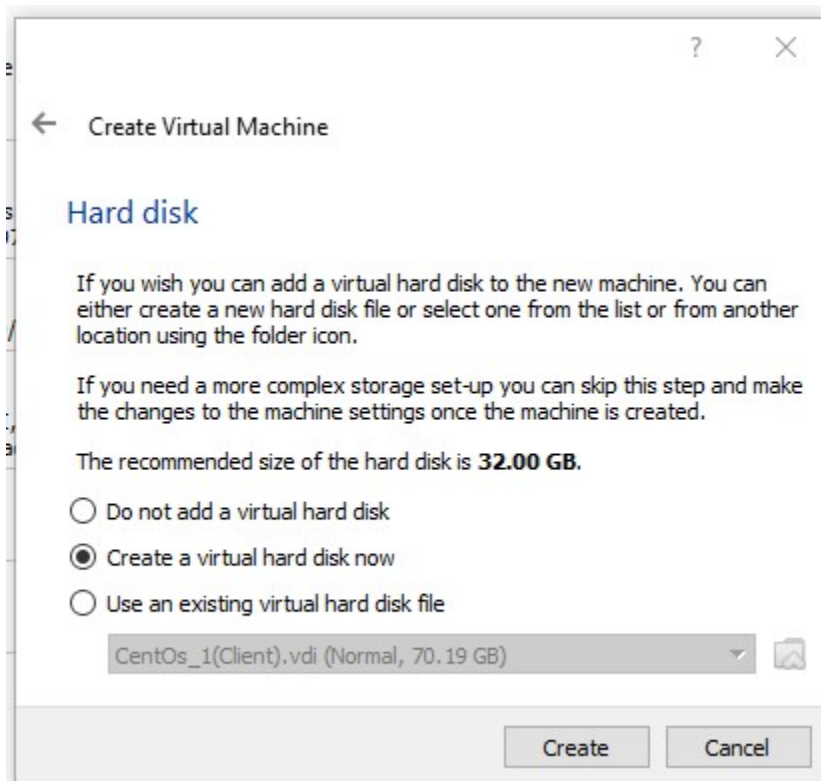

1. Windows Server-2019

**Step-1:-** go to virtual box select new option and Give name "Windows_server_name"

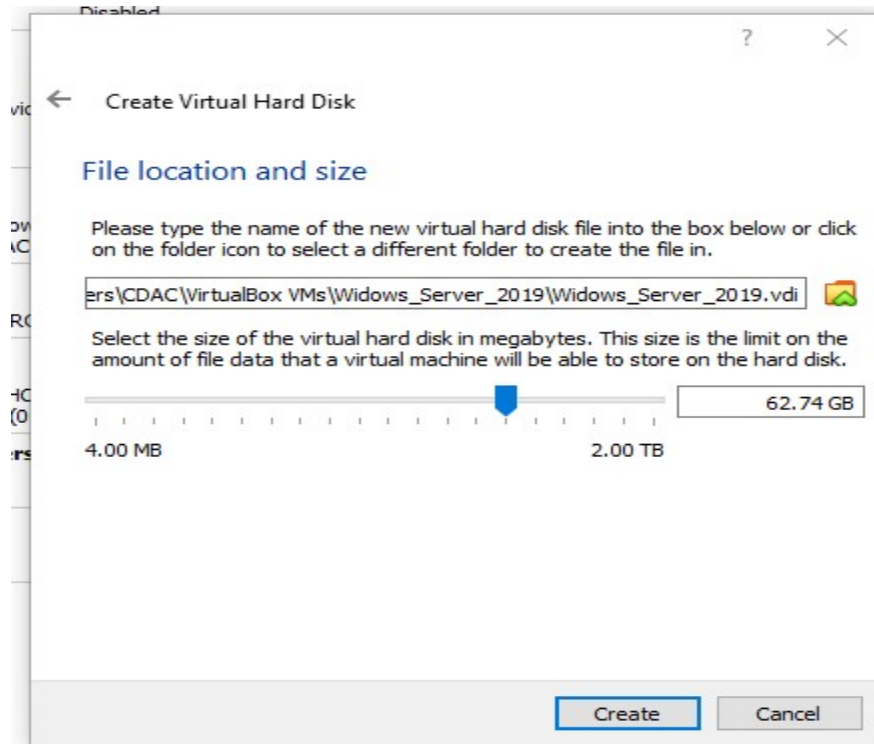

Step-2:- Give RAM 6556 MB

Step-3:- Create virtual hard disk —-> select VDI —-->Select dynamic allocate

Server: Disabled
Disabled

Create Virtual Hard Disk

Hard disk file type

Please choose the type of file that you would like to use for the new virtual hard disk. If you do not need to use it with other virtualization software you can leave this setting unchanged.

- ● VDI (VirtualBox Disk Image)
- ○ VHD (Virtual Hard Disk)
- ○ VMDK (Virtual Machine Disk)

Server: Disabled
Disabled

Create Virtual Hard Disk

Storage on physical hard disk

Please choose whether the new virtual hard disk file should grow as it is used (dynamically allocated) or if it should be created at its maximum size (fixed size).

A **dynamically allocated** hard disk file will only use space on your physical hard disk as it fills up (up to a maximum **fixed size**), although it will not shrink again automatically when space on it is freed.

A **fixed size** hard disk file may take longer to create on some systems but is often faster to use.

- ● Dynamically allocated
- ○ Fixed size

[Next] [Cancel]
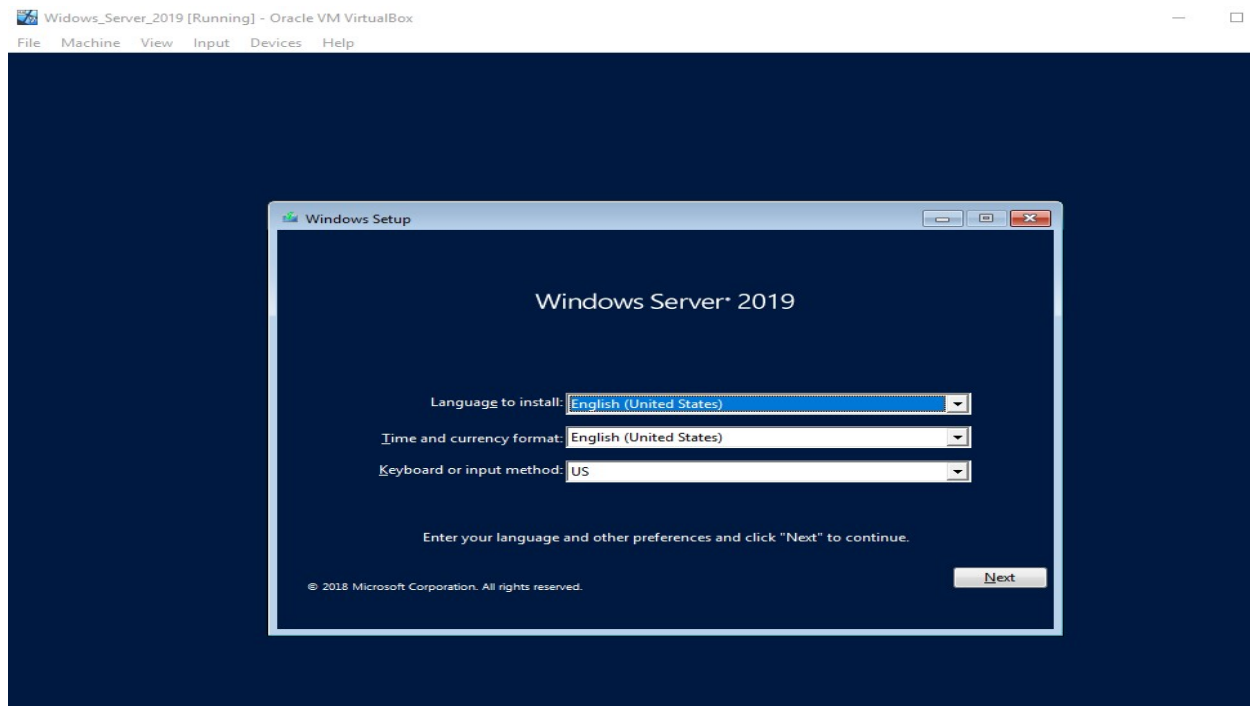

Step-4:- To Give HDD size = 62.74 GB

**Step-5:- Go to storage on Select SATA option**
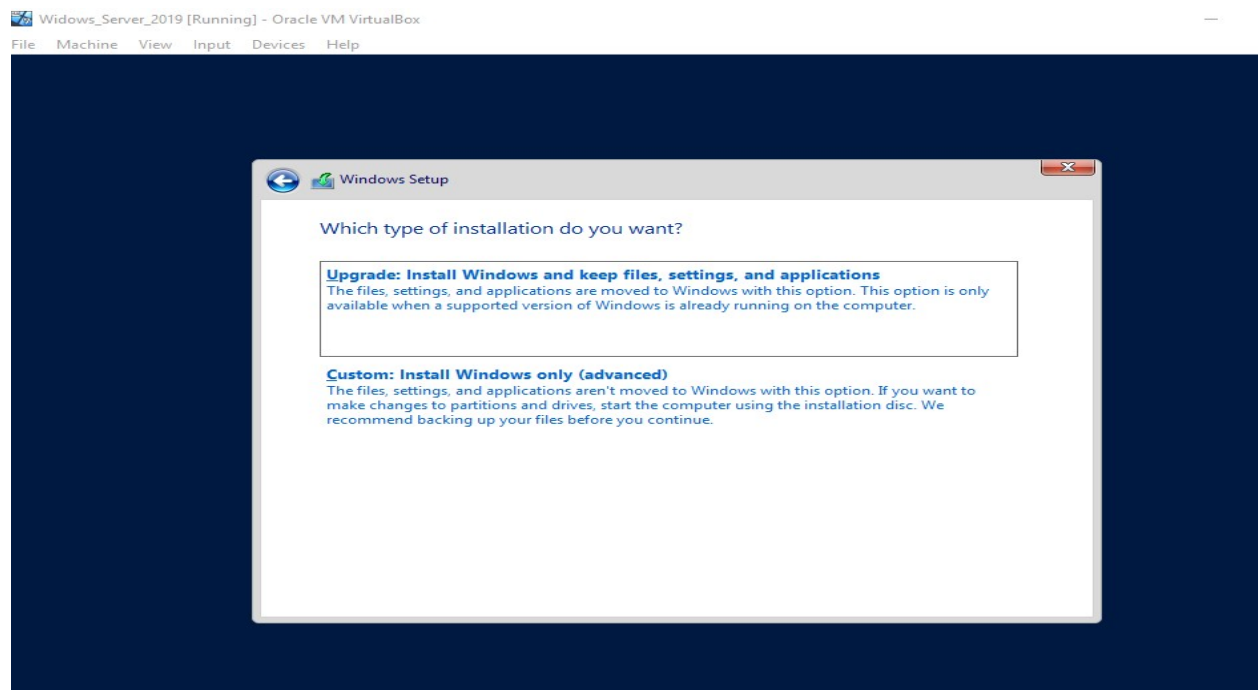

Add ISO Image windows_server_2019

# Step-6:- Select language option go to US English

# Step-7:- Select Windows Server 2019 Datacenter Evaluation(Desktop Experience)
