# Assignments:-15

Module:- COSA(Mount_Dirctory-Windows server-2019)
## Name:- Prithviraj Nikam

Lab Assignment :-

**Task:- Add a partition as a Volume mount point in windows 2019**

Step-1:- Create a directory for mounting partition as volume mount point

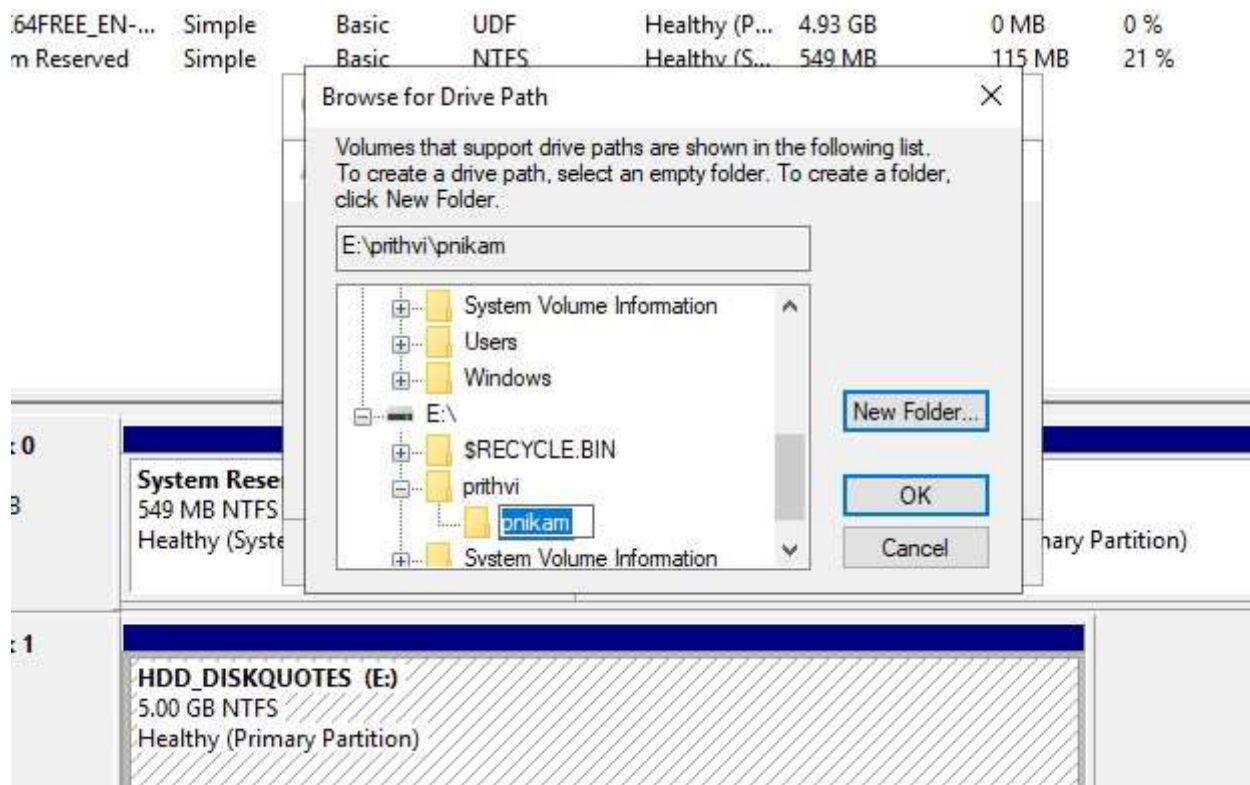

Go to mmc and Select partition —> go to property—-> and go quota—-> Disabled the Quota option Before Mounting
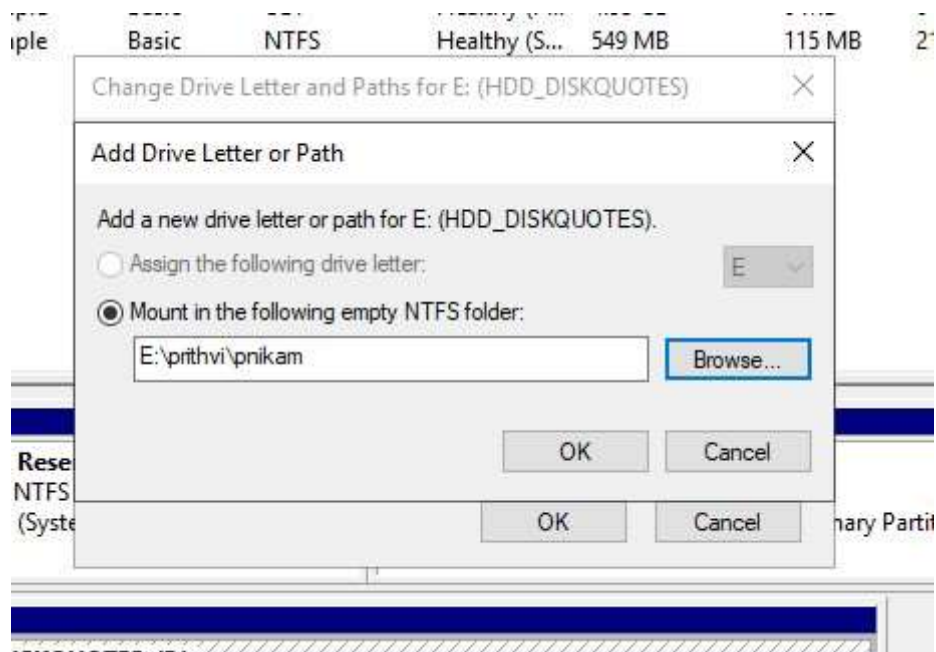

Step- 2:- Right Click on partition select "Change Drive letter and Path"
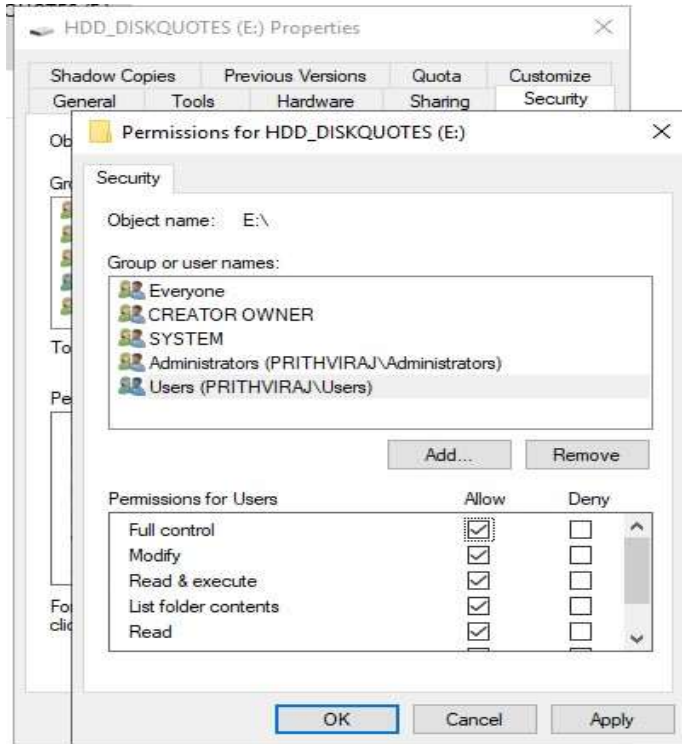

**Select E drive and create Mount folder**

The path can be browsed

To give User permission on Full Control

Step-3:- Mount this partition on the Directory created in step-1
